Value-based healthcare in inherited bleeding disorders

1. Patients and caregivers prioritize different health outcomes compared to healthcare professionals. *(This thesis)*
2. Heavy menstrual bleeding and its influence on patient's quality of life, daily activities and social relationships is often overlooked by healthcare professionals. *(This thesis)*
3. Unidimensional instruments are preferred over multidimensional instruments to measure generic patient-reported outcomes in patients with inherited bleeding disorders. *(This thesis)*
4. Patients are willing to complete a patient-reported outcome measure (PROM) before their consultation at an outpatient clinic. *(This thesis)*
5. For PROMs to have any added value in the consultation room, the patients' answers on the PROMs should be discussed during the consultation with the healthcare professional. *(This thesis)*
6. Low key discussions on practice variations, patient outcomes and patient experiences is necessary to stimulate continuous learning and quality improvement among healthcare professionals, but does not necessary require perfect outcome information. *(Based on Nelson E.C. et al. 1998)*
7. If we keep fishing in the same pond, the fish will eventually stop biting. This also applies to patients with inherited bleeding disorders. *(Based on Leeper T.J. 2019 and Eggleston J. 2024)*
8. Assertiveness is a skill necessary to survive the healthcare landscape. *(Based on Street R.L. 1991, Street R.L. et al 2005, and Krupat E. et al. 1999)*
9. Mistakes or setbacks are essential for personal growth and provide opportunities for innovation. *(Based on Gaiman N. 2011 and Weinzimmer et al. 2017)*
10. In business and life, you don't get what you deserve, you get what you negotiate. *(Based on Karrass C.L. 2013)*
11. "If you don't know where you want to go, then it doesn't matter which path you take" *(Disney's Alice in Wonderland 1951)*
