### Medical Psychiatry Units Organization, Costs, and Effects

1. The costs of medical healthcare utilization are higher in patients with medical-psychiatric comorbidity compared to patients without this comorbidity. *[this thesis]*
2. The organization of MPUs is more mature in the Netherlands compared to the US, where these units originated. *[this thesis]*
3. MPU treatment results in better health outcomes and decreases costs compared to care as usual. *[this thesis]*
4. DBCs have not resulted in transparency on quality and costs of Dutch healthcare. *[this thesis]*
5. Most MPUs in the Netherlands are able to treat patients with high medical and psychiatric acuity, which is congruent with the target population of these units. *[this thesis]*
6. Because entrepreneurship in healthcare is discouraged by the government, Dutch healthcare lags behind in digital innovation.
7. If it is allowed that companies like Philips, KPMG and Chipsoft pay dividends which are earned within Dutch healthcare, this should also be allowed for the healthcare providers itself.
8. It is unjustified that the COVID pandemic is used as an argument against market forces in healthcare.
9. Code black has shown us where an endless growing healthcare demand will lead us.
10. Bitcoin should be the global reserve currency.
11. Er is niks beters dan dansen met Jansen (vrij naar Hugo de Jonge).
