

1. Respiratory sequelae in children post laryngotracheal stenosis repair are caused by the remaining stenosis, as well as A- frame deformations at the site of previous tracheal cannula and pre- existing co-morbidities. (*this thesis*)
2. Dynamic evaluation by upper airway MRI adds clinically relevant information for the follow up of paediatric laryngotracheal stenosis. (*this thesis*)
3. Also preterm born children not meeting the National Health Institute diagnostic criteria of bronchopulmonary dysplasia can have clinically significant structural lung changes. (*thesis*)
4. Chest MRI can be used as a radiation- free tool for follow up of patients with congenital lung abnormalities. (*this thesis*)
5. Music can comfort and distract children during MRI and can thereby aid in the feasibility of paediatric MRI. (Edwards *et al.* Pediatric Radiology 2011)
6. The interpretation of radiological imaging should be an important part of every paediatric residency curriculum.
7. Increasing the potential of women as leaders within healthcare is a critical long-term investment for organizational success, improved health policy, national prosperity and quality of life. (Mousa *et al.* The Lancet 2021)
8. Onze generatie moet de komende twee decennia de klimaatambities verhogen en kan het niet veroorloven om Europese doelstellingen van een uitstoot neutrale economie te missen.
9. Growing up with a dog reduces your chance of developing asthma. (Fall *et al.* JAMA pediatrics 2015)
10. When you know and respect your inner nature, you know where you belong. You also know where you don't belong. (Benjamin Hoff, The Tao of Pooh)
11. Een promotietraject is als het schaatsen van de Alternatieve Elfstedentocht, het is een lange zware tocht, en je houdt het alleen vol als je geniet van al het moois om je heen.
