Research interests

Trained at the universities of York (BA), Cambridge (MPhil), and Utrecht (PhD), I am an Associate Professor at the Erasmus School of History, Culture and Communication. My research addresses critical societal questions by using historical data to understand long-term impacts of epidemics and other hazards and disasters on society, with a specific focus on how they are affected by and contribute to inequalities. I also have a strong interest in rural history and development.

More specifically, I have tried to better understand how societies interpret and cope with epidemics, and how epidemics help shape societies that experience them—developing a new paradigm for epidemic-society interaction whereby I suggest the big question is not why epidemics cause substantial structural change but why, given that mortality is often so great, change is often so minimal and temporary?

Over my career, I have published widely across many different disciplines of history and related fields – I have more than 40 international peer-reviewed articles and chapters and have 3 books (with a 4th on the way, and a 5th under contract) including an open access synthesis of all the most up-to-date thinking on historical disasters with CUP library.oapen.org/bitstream/id/93f950ad-464d-4002-9aaa-3e1a3b3fe823/Disasters_and_History.pdf and an open access study on how epidemics have been visualized across the long term of cinematic history with Routledge library.oapen.org/bitstream/id/6c39960d-e611-4418-a697-1b6e6b1a2140/9781000540765.pdf. In recognition of my contribution to historical research, I am a fellow of the **Royal Historical Society** (UK).

I am happy to hear from any prospective students (BA/MA/PhD) interested in the broad domain of environmental hazards, famines, and diseases in the past, and their implications for social and economic development over the long term.

Qualifications

PhD, *Pre-Industrial Societies and Strategies for the Exploitation of Resources: A Theoretical Framework for Understanding Why Some Societies Are Resilient and Some Settlements Are Vulnerable to Crisis*, Utrecht University
Award Date: 31 Aug 2012

Master, *A Comparative Study of the Impact of Social Structure and Tenure on Nucleated and Dispersed Settlement in 8 Cambridgeshire Parishes, 1275-1340*, University of Cambridge
Award Date: 1 Oct 2009

Bachelor, History, University of York
Award Date: 31 Jul 2006

Employment

Associate professor
Department of History
Erasmus University Rotterdam
1 Sept 2020 → present

Research outputs

Lifecycle Land Decumulation Strategies in a Seventeenth-Century Rural Community

Curtis, D. R. & van Besouw, B., 8 Dec 2024, In: *Economic History Review*. p. 1-30 30 p.

Trade, Production, and Disease in the Middle Ages

Curtis, D. R., 1 Feb 2024, *Routledge Medieval Encyclopedia*. Klemetilä, H. & McAlister, V. (eds.). London: Routledge (Taylor & Francis Group), p. 1-8 8 p.

Plague and Epidemic Disease in the Northern Parts of the Low Countries, 1349-1450: Evidence, Limitations, and Implications

Curtis, D. R., 2024, In: *Tijdschrift voor Sociale en Economische Geschiedenis*. 21, 2, p. 75-103 29 p.

From disease incubation to disease receipt: Representing epidemics and race in pre- and post-second world war American cinema (1931–1939 and 1950–1962)
