Research interests

Jason Pridmore is the Vice Dean of Education for the Erasmus School of History, Culture and Communication and an Associate Professor in the Department of Media and Communication at Erasmus University Rotterdam. Jason directs the educational resources of the faculty including the education professional services personnel and oversees the bachelor and (pre) masters programmes in three departments. He is the coordinator of both SEISMEC, an EU funded project piloting Human Centric Industry innovations, and COALESCE, which will build a European Science Communication Competency Centre. Jason is also the lead on several projects with his research team, including SPATIAL, Ashvin, REINCARNATE, and he co-leads the Inspiring and Anchoring Trust in Science project. Previously, Jason led the TRESKA project, and was the Project Exploitation Manager and Data Security Manager on the BIM-SPEED project. He was the Principle Investigator in the Netherlands on the Mobile Privacy Project.

His research interests are focused primarily on practices of digital science communication, digital identification, the use of new/social media and consumer data as surveillance practices, and digital (cyber) security issues. He has written extensively on marketing practices and information exchange and participates in research focused on privacy, data ethics, mobile devices, policing practices, citizenship, branding and quantified self movements. Jason currently participates in an advisory capacity for a range of European Union Research projects and Dutch funded projects on new technologies, privacy, and security issues.

He is co-editor of the book *Digitising Identities: Doing Identity in a Networked World* published by Routledge press. Prior to joining the department, he was the Senior Researcher on the DigIdeas project based in Maastricht, the Netherlands. This project examined the social and ethical implications of digital identification, with his research focusing specifically on consumer identity and identification practices and the use of new media in marketing practice. Jason received his PhD from the Department of Sociology at Queen's University, Canada, in 2008. Before moving to the Netherlands, he worked as a Post-Doctoral fellow as part of The New Transparency Project within the Surveillance Studies Centre at Queen's University.
